

Notes

Further research needed to validate this.

Military

33% of tags

Related terms: War, Armed Forces, and different military branches

Politics and economics

Related terms: Policies, trade, industry

Was Business, finance and innovation and some of International trade and affairs

Law

3% of tags

Related terms: Legal, court cases, trials

Was Crime, courts and justice

Food and land

3% of tags

Related terms: Agriculture, forestry, (urban) planning

A combination of Agriculture and environment and Land and buildings

If possible split out Architecture records and add to this group. Probably includes records tagged Ancient monuments and buildings too.

Transport and travel

3% of tags

Not a label or group that was generated by users. 75% of this is shipping and sea merchants. 'Shipping' was term users came up with.

Government and society

Possibly about 7-8% of tags (?)

Possibly could be labelled just 'Society'.

This grouping should be tested.

* Check whether child items should come up one level and if other groups should go within.

* From British state and citizens, only 'Education' was grouped here. Test whether the other information belongs in this group and could be categorised.

* Test grouping and placement of 'Work and science'

Includes Family and identity and British state and citizens.

* Births, deaths and marriages – the archive does include information on births. Research has indicated that users may expect birth certificates. Signpost and link to them if they are not included in the Explorer.

* Work and science – Includes anything related to manufacturing, science and energy.

* Immigration – 'Migration' wasn't a label users generated, but may be more appropriate. *Related term:* Naturalisation. This term was also identified as unclear; do not use on its own.

Arts

1.5% of tags

Split 'Art, architecture and design', so this just includes 'Arts'.

Re-test this label.
